**Subject:** Comprehensive map search site  
Matt and Lam

In case you haven't seen this website it is pretty neat. Got this from our Regional Science Council.  
[http://ngmdb.usgs.gov/ngmdb/ngmdb\\_home.html](http://ngmdb.usgs.gov/ngmdb/ngmdb_home.html)

According to them, the most effective search is to use

- the map view zoom in to your location,
- then click on list pubs in view which will populate from the catalog.

Some results you can download, others it tells you where to find them. It is a combination of USGS, state geologic surveys and university records.
